PDL Item #: 104461-1

This is a new Clutch Kit for use with Volvo I-Shift and Mack mDrive automated manual transmissions which engages and disengages without the use of a traditional in-cab clutch pedal.

Designed for longevity, this clutch is for the 13L engine with an AT2412, AT2512, ATO2512, AT2612, or ATO2612 automated manual transmission.
