Interchangeable Clutch Sets

Platinum Driveline offers two different clutch sets for each below listed application to appeal to the preferred design style of all customers.

Affected Applications:

Year	Make	Model	Engine
2005-06	Ford	Mustang	8 cyl 4.0L 244"
2007-10	Ford	Mustang	8 cyl 4.0L 244"

PDL Kit # 07-189/07-194

These two kits pair with flywheels that match the OE style units:

2005-06 Ford Mustang 4.0L
(07-189 and FW780)

2007-10 Ford Mustang 4.0L
(07-194 and FW781)

PDL FW780

PDL FW781

PDL Kit 07-202

PDL Kit # 07-202

The flywheel contained in this kit has been engineered, along with the kit, to work for all 4.0L Mustangs within the 2005-2010 year range.

This flywheel **DOES NOT** resemble the original equipment flywheel.

The OE flywheel is stepped and this replacement is flat. Do not be concerned. This clutch kit is a direct replacement for the OE clutch, disc and flywheel and **MUST** be installed as a complete unit.

For this option You **MUST** use the clutch, disc, and flywheel contained in this clutch kit as a matching set.
