

## Technical Service Bulletin

### New Clutch Forks

Platinum Driveline is pleased to offer a comprehensive line of new clutch forks. These items are designed to compliment our existing new clutch kit program by providing all the necessary replacement parts required to service the entire clutch system. For example, worn or bent clutch forks are one of the leading causes of no release and release bearing noise in 1983 through 1995 GM light trucks.

Each PDL new clutch fork is carefully matched to the specific application and includes the following features:

- New OE style ball stud spring-steel retaining clips on many stamped steel forks
- New OE style spring-steel retaining clips on many stamped steel forks
- Comprehensive installation information when needed
- GM S-10 & S-15 forks are compatible with the redesigned OEM greaseable ball studs
- OEM fit, form, and function
- Backed by a 90-day warranty against defects in materials and workmanship

The PDL clutch fork program consists of 16 part numbers, to suit the majority of customer needs

The PDL new clutch fork program compliments our "SELL THE SYSTEM" philosophy, by providing our customers with a wide-ranging program of new clutch kits, new clutch hydraulics, new flywheels, new clutch cables, and new clutch fork ball studs...all the parts required for a professional clutch replacement.
