

## Mazda Release Bearing Info

Due to high failure rates, Mazda redesigned the clutch fork on certain Mazda 3 and 5 models outlined below.

### **Affected Applications**

Year	Make	Model	Engine	Kit #	PDL Item #	Fitment
2006 - 10	Mazda	5	2.3L	10-059	N1759SA	w/OE Style Fork
2004 - 14	Mazda	3	2.0L	10-059	N1759SA	w/OE Style Fork
2004 - 09	Mazda	3	2.3L*	10-059	N1759SA	w/OE Style Fork
2006 - 10	Mazda	5	2.3L	10-059	N4082	Redesigned Fork
2004 - 14	Mazda	3	2.0L	10-059	N4082	Redesigned Fork
2004 - 09	Mazda	3	2.3L*	10-059	N4082	Redesigned Fork

The OE style bearing was included in the clutch fork assembly, but the redesigned clutch fork requires a different style bearing than the original equipment fork. To use the new style bearing you must also replace the original clutch fork with the new design and a new pivot pin/ball.

*Note: Platinum's kit #10-059 includes both bearings for ease of installation.*
